Shocking New Allegations Made Against President Bill Clinton by Unidentified Employee of AMC

Albania (WHN) Famous lawyer Rob M. All, general counsel to the WHN, today announced that an employee of the Albanian Medical College has filed sexual harassment charges against President Bill Clinton. While the alleged victim has not been identified, reliable sources have provided the WHN with a photograph of the plaintiff.

According to the suit filed in Federal Court, President Clinton "failed to make the desired sexual advances" towards the alleged victim during his visit to Albania with Pope Hugh Hefner I. The plaintiff claims that this represented "reverse-sexual harassment" and has had a negative impact on the plaintiffs quality of life and career. Lawyer Rob M. All states that because no sexual harassment occurred, the plaintiff did not have sufficient grounds for blackmailing the President for secure Federal research monies. Consequently, the plaintiff has had no recourse but to sue the President for "failure to attempt to seduce". Legal Scholars John Wayne Bobbit and Joey Buttafuccho have filed briefs (not boxers) supporting the plaintiff. In briefs, these scholars concluded that "failure to make sexual advances constitutes a crime against humanity".

President Clinton, while refusing to discuss this case directly, stated, "All I can say is, I'm no criminal and I did nothing French....French-Canadian maybe...but *not* French".

Please Mr. President, **Kiss Me Too!**

Protecting Us From Ourselves

The AMC Environmental Safety Office

Albania (WHN) The risks associated with working in the lab are many [e.g., carcinogens, volatile fluids, acids, bases, and immobilized asbestos (i.e., lab benches)], consequently we NEED someone to take charge and prevent us from hurting ourselves. That's why the Albanian Medical College has the **Environmental Health and Safety Office** who's motto is, "Make'em Safe Even If It Kills'em". An important role for these *Guardians of Laboratory Safety* is to prioritize and rate the risks faced by the average uninformed, if not slightly "intellectually challenged", investigator. For example if your average scientist is faced with the dilemma of choosing to fix a broken fumehood or replacing asbestos containing lab benches, they would most likely make the wrong choice (i.e., the fumehood). Fortunately for us however, AMC has a crack team of Safety Officers who, after days of education are trained to make the right decision for us. To hell with the fumehood, there's ASBESTOS in those there lab benches!

Studies (see table) demonstrate that asbestos are a major killer in America. *Each year* one-fourth of a student dies as a consequence of asbestos exposure (based on an estimate of 50 million school age children) in American schools. Because of this extraordinary death threat in our schools, the United States has devoted

over one billion dollars per year to remove this threat. We are proud to say that AMC has contributed its share to solving this threat to humanity. So forget about that broken fumehood (and the poisonous gas tank within it) and thank your AMC Safety Officer for removing those deadly lab benches (at a cost of only \$20,000 per bench).

Enter the WHN Safety Photo Contest!

See Page 2 for Details!

Cause	Annual Rate (Deaths per million)
Asbestos Exposure in Schools	0.005 - 0.006
Whooping Cough Vaccination	1-6
Aircraft Accidents	6
High School Football	10
Drowning (ages 5-14)	27
Auto-Pedestrian Accidents (ages 5-14)	32
Home Accidents (ages 1-14)	60
Long-Term Smoking	1200

Jennifer Capriati Goes For The Gold! *Acapulco Gold That Is!*

Boca Raton (WHN) Cracking under the pressure of the professional tennis tour, Jennifer Capriati has entered a drug rehabilitation clinic in Miami, Florida. Stating, "I just let it all get under my skin." Ms. Capriati denied using any drugs other than the occasional aspirin. She further insisted that all reports to the contrary were made by "crack pots" Ms. Capriati indicated that, being the heroin she is, she would just pop a couple of pills (aspirin of course), and snort at her detractors.

Contest!

Win a free safety inspection by the *Albanian Safety Police* if YOU can identify the 6 safety & PC (politically correct) violations in this picture!

Medical Alert!

Chinese & French Scientists Warns of 'Hairy Problem'

Beards a major cause of mental retardation!

Actual Scientific Findings!

Beards harm health and cause baldness, China's official *Disaster Reduction Press* newspaper quoted scientists as saying. Facial hair attracts and traps more airborne chemical pollution, causing bearded men to breath air 6.1 times dirtier than if they were clean shaven, the report said.

The baldness threat was attributed to an unidentified French researcher's claim that beards inhibit the body's capacity to shed excess heat: "This makes the scalp too hot and affects the function of the brain. To compensate, the body drops hair from the head."

The theoretical repercussions of the above finding are frightening. Among the concerns being studied are:

- What effect does second hand beard growth have the the significant other(s) of the bearded one?*
- Does this explain why the bearded lady works in the circus and not as a rocket scientist?*
- Is there a correlation between facial hair and NIH funding?*
- Does I.Q. decrease with increasing beard length and/or cranial hair loss?*
- What is the death rate of bearded vs. clean shaven men in heavily polluted cities?*
- Did Norelco and Gillette fund these studies?*

Disaster Strikes Albania International Airport

Critics Argue Need For Modernization

Albania (WHN) Disaster has once again struck Albania International Airport.

On Tuesday, Northwest Flight 899 went up in flames as it attempted to touch down at Albania International. Information is sketchy, but FAA authorities have privately blamed the antiquated facilities present at Americas first public airport. However, Airport Commissioner Ralph Zeppelin states that, "The current fatalities..oops, I mean facilities, continue to meet the needs of the Albanian public and do not need to be improved." Frequent Northwest flyer John W. Eaton agreed with this assessment since, "Northwest knows the landing is a bitch, so they give you lots of free beer just before they start the decent. I guess they figure that if you're really drunk, you won't know or care if you make it. I know I feel that way, besides anything that gets you free beer is o.k. with me...I only wish they would also give out some peanuts."
